

**Hong Kong Oral Motor Reconstruction Therapy Centre**  
**Bridging PROMPT Technique to Intervention**  
**21<sup>st</sup> – 23<sup>rd</sup> November 2022 (MON – WED)**

### **About PROMPT**

PROMPT, an acronym for *PROMPTS for Restructuring Oral Muscular Phonetic Targets*, is a *multidimensional* approach to speech production disorders that has come to embrace not only the well-known *physical-sensory* aspects of motor performance, but also its *cognitive-linguistic* and *social-emotional* aspects. PROMPT is about integrating all domains and systems towards positive communication outcomes. It may be used (with varying intensity and focus) with all speech production disorders from approximately *6 months of age onward*. To achieve the best outcome with PROMPT it should not be thought of or used mainly to facilitate oral-motor skills, produce individual sounds/phonemes or as an articulation program but rather as a program to develop motor skill in the development of language for interaction.

Almost every clinician will have a caseload that will include a child or adult with a speech production disorder. The delays or disorders may range from stuttering, language formulation, syntax, motor control or planning, phonological or "rule based" learning disorders, auditory processing and production disorders, general cognitive or global delays. Whatever the reason, PROMPT may be used to *facilitate production, revise or change production* or to *integrate motor production with cognitive-linguistic function*. PROMPT training will also give each clinician a more organized way to assess all domains and organize this information for the *most effective and functional treatment program*.

### **Course Objectives**

At the conclusion of the workshop, participants will be able to:

1. Describe and apply the *PROMPT Application principles and Technique*.
2. Differentiate and apply, alone or in conjunction, *Parameter, Syllable, Complex and Surface PROMPTs* with varying speech production disorders.
3. Describe and demonstrate the three *planes of movement* and how they are used in PROMPT.
4. Identify initial parameters and priorities to begin *goal setting* with various client exemplars.
5. Develop *motor-speech goals* that bridge technique to *language and social interaction*.

## **Our PROMPT Instructors and Assistant Instructor**

### **MARIA JERILEE F. CASAS**

#### **QUEZON CITY, MANILA**

Jerilee received her degree as a speech pathologist from the University of the Philippines-Manila. She has been practicing as a pediatric speech pathologist for over 15 years.
