

K-Taping: Speech and Language Therapy

INSTRUCTOR:
DR. ROGER EHRENREICH

Master Lecturer and International Coordinator of K-Taping Academy
Managing Director of Schools for Therapists Trainer for Managers
Lecturer in Medical Professions

K-Taping is a holistic and drug-free therapy method that has an exceptionally wide range of applications. The International K-Taping Academy, founded by Birgit Kumbrink, is the leading pioneer and developer of Taping techniques and continuing education courses in K-Taping Therapy. K-Taping is used today in physiotherapy, sports physiotherapy, paediatrics, occupational therapy, neurology, gynaecology, lymphology and also speech therapy.

In the K-Taping: Speech and Language Therapy Course, various techniques are used to present all the basic techniques and associated combination techniques for indications that are frequently used in therapy, including Muscle techniques, Ligament techniques, Fascia techniques and Lymphatic techniques. In addition, the basic techniques for the application of Crosstape are presented and learned through practical exercises.

The course has a high practical share in which the participants will have the chance to practice the techniques on each other. The learning control takes place during the practical exercises by experienced instructor. This course will enable you to include K-Taping Therapy in your treatment right after the course. The high-quality and detailed course handbook contains all techniques and indications presented in the course and serves as an extensive practical handbook for your own use after completion of the course.

Learning Objectives/Outcomes:

- 1. Basis of the K-Taping Therapy including development, basic idea, material properties and functionality**
- 2. Theory and Practical exercises on:**
 - Muscle Techniques
 - Ligament Techniques
 - Correction Techniques
 - Specific Indication Techniques
- 3. Theory and Practical exercises for dysphagia**
